I feel that satellite radio should be able to broadcast any content they choose including the dissemination of traffic and weather. By restricting my access to this important information is forcing me to listen to commercial radio which I choose not to do. Please do not continue to abridge my rights any further. I am already dismayed at the actions of the FCC in regards to what the board feels I as an adult cannot listen to. The minority of listeners who feel that they are being offended have the absolute right to change the dial!
